

Laure Ciesla

Talk at session 10:

"Dust in galaxies: from the local interstellar medium to distant galaxies"

The Future of Instrumentation for Dust Observations

I will provide an overview of the different projects and concepts proposed to observe the Universe in far-IR and submm in the future in the framework of the M7 class missions and NASA probe call, focussing first on missions with a French involvement but not only. The review will be followed by a discussion led by Denis Burgarella.
