

## **S14 L'astrophysique française à l'heure du JWST : opportunités et défis**

Title of contribution: JWST – status and upcoming milestones

Authors: Stephane Charlot & Pierre Ferruit

Since its very successful launch on December 25, 2021 by an Ariane 5 rocket, JWST has been fully deployed and its commissioning has so far gone very smoothly. By the time the 2022 edition of the SF2A days takes place in early June 2022, JWST will have entered its final commissioning phase. In this talk, we will provide an update on the Webb commissioning and outline the upcoming milestones, not only for commissioning, but also from a communication and science perspective.
